SUMMARY

Second-year student with an interest in software development and a strong desire to learn and grow. Detail-oriented, curious, and persistent, I am eager to apply my knowledge through hands-on projects and real-world applications. Seeking opportunities to enhance my skills, collaborate with experienced professionals, and contribute to the development of software solutions.

EDUCATION

Bachelor of Economic Informatics   Oct 2023 - Jun 2026
Bucharest University of Economic Studies

Baccalaureate Diploma, Mathematics-Informatics   Sep 2019 - May 2023
Tudor Vianu National College of Computer Science

SKILLS

Technical Skills	C++, SQL, OOP
Soft Skills	Detail-oriented, Teamwork, Adaptability, Continuous Learning

PROJECTS

Grade Management. A C++ project implementing the Object-Oriented Programming (OOP) paradigm to create a rudimentary grade management system for students. Each academic year, semester, and class is represented as an object, allowing users to dynamically add new entries for a specific degree. (GitHub Repository)

Phone Company Database. Designed and implemented a relational database in Oracle SQL Developer to manage customer, employee, and infrastructure data for a phone company. Added indexes and constraints to improve efficiency and ensure data integrity. (GitHub Repository)

Basic Calculator. A C++ project implementing a pocket calculator with basic arithmetic operations, including addition, subtraction, multiplication, division, square root, exponentiation, and reciprocal. (GitHub Repository)

CERTIFICATES

- **Certificate in Advanced English** - Level C2 (Grade A)

- **IC3 Digital Literacy Certification** - Computer Literacy

- **Oracle Database Design and Programming with SQL** - Fundamentals of SQL programming language
